International Patent Classification (IPC) or nati	onal classification and IPC						
Applicant							
A. RAYMOND & CIE							
This report is the international prelir under Article 35 and transmitted to the		d by this International Preliminary Examining Authority					
2. This REPORT consists of a total of	4 sheet	s, including this cover sheet.					
3. This report is also accompanied by A	NNEXES, comprising:						
a. (sent to the applicant and	to the International Bureau) a total o	f sheets, as follows:					
sheets of the descrip	tion, claims and/or drawings which h	ave been amended and are the basis for this report and/or					
sheets containing re Instructions).	ctifications authorized by this Author	ity (see Rule 70.16 and Section 607 of the Administrative					
		hority considers contain an amendment that goes beyond					
the disclosure in the Box.	international application as filed, as	indicated in item 4 of Box No. I and the Supplemental					
b. (sent to the International	Bureau only) a total of (indicate type	and number of electronic carrier(s))					
Sem to the International	Bureau only) a total of (indicate type	***					
related thereto in computer	, containing a sequence listing and/or tables						
related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).							
4. This report contains indications relati	ng to the following items:						
Box No. I Basis of the	Box No. I Basis of the report						
Box No. II Priority							
Box No. III Non-establi	shment of opinion with regard to nov	elty, inventive step and industrial applicability					
Box No. IV Lack of uni	ty of invention						
		ard to novelty, inventive step or industrial applicability;					
	citations and explanations supporting such statement						
	ruments cited						
Box No. VII Certain def	ects in the international application						
Box No. VIII Certain obs	ervations on the international applicat	ion					
Date of submission of the demand	Date of comp	letion of this report					
Name and mailing address of the IPEA/EP	Authorized of	ficer					
Facsimile No.	Telephone No	).

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1: EP 1 069 632 A (COUTIER MOULAGE GEN IND) 17 January 2001 (2001-01-17).

Document D1 is considered the prior art closest to the subject matter of claim 1. It discloses (the reference signs between parentheses relate to D1): a device for attaching a housing (battery 20), in particular that of a motor vehicle battery, to a support plate (bac 2), wherein an attachment arm (8) integral with the plate comprises an attachment part (9) which attaches the housing to the support plate.

The subject matter of claim 1 therefore differs from the known document D1 in that the attachment part is a separate, elastically bent part and inserted in a tensed manner between the wall of the housing positioned on the support plate and a retaining edge protruding vertically upward therefrom.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

PCT/EP2004/002485

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The problem to be solved by the present invention is therefore understood to lie in the fact that with the attachment device of document D1, an involuntary movement of the attachment arm (8), as a result of which the connection between the attachment part (9) and the housing (battery 20) may be released or unlocked, remains possible, which is very unsafe.

The solution to the above problem, as proposed in claim 1 of the present application, involves an inventive step (PCT Article 33(3)), for the following reasons:

The structure of the attachment part and its connection to the support plate and the housing secures the locking mechanism against involuntary unlocking.

Claims 2 to 9 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
